

# FLEXY TWIN

# FLEXY TWIN

Modular system which allows you to cover large areas with a minimalist but at the same time innovative design.

An aluminum silver powder coated mast and one or two independently closable and tiltable awnings, provide shade where it is needed.

The system allows to connect several Flexy Twin. Ideal for contract (hotels, restaurants...) and residential use (villas, private gardens).

The canopy closes easily thanks to a simple pulley system.

The Flexy Twin can be supplied with both freestanding or ground insert bases.

The structure is made of aluminum with stainless steel hardware.

On request it can be equipped with lights. All FIM Products are designed and made in Italy using the finest materials for outdoor use, ensuring long life even under the harshest environmental conditions.

• Independent opening of each canopy

• Possibility to cover large spaces joining several Flexy of different dimensions

Size	
	250x523
	250x240

• Cover made of individual panels

• Independent tilt system for each canopy

BASI

COD. GBASE004000

### BASE FLEXY TWIN

Hot dip galvanized steel base with adjustable feet.  
Requires dedicated concrete ballast or equivalent.

COD. GZAVO000200

### ZAVORRA IN CEMENTO FLEXY TWIN

Three cement ballasts for single base.

COD. GBASE003900

### BASE STYLO FLEXY TWIN

Steel ground insert base.  
Supplied fixing screws.

COLOURS

### **Acrylic fabric**

Water repellent and stain-resistant acrylic fabric. Available in Ecu (raw) colour.  
The ideal fabric, excellent value.  
290 gr/m<sup>2</sup>.

### **Solution dyed Acrylic fabric**

Designed for outdoor use, the solution (spun) dyed acrylic fabric resists salt water, chlorine and any type of harsh climate. Colours do not bleed and remain vibrant for a long time. A specific treatment makes the fabric water repellent, mould resistant and protects it from staining. This type of fabric resists the most extreme conditions and is suitable for year-round use in gardens, terraces, pool sides or on-board boats. It's definitely the top choice canopy fabric to select for your Product.  
UPF 50+ (UV Protection Factor) 280 gr/m<sup>2</sup>.

### **Micro-Mesh fabric**

This fabric allows natural air flow and has an excellent resistance to wind, ensuring a pleasant shading at the same time. Suggested to those who want a surely eye-catching alternative fabric. Its fibre composition, taking advantage of the "Precontraint" technology, guarantees an exceptional resistance to tearing, ultraviolet light and mould.  
410 gr/m<sup>2</sup>.

### **Airfim fabric**

Waterproof fabric assuring total protection from rain, which does not even permeate the stitches. A stain-resistant treatment contributes toward a better dirt resistance of the fabric, too. A regular wash with a neutral cleaning agent guarantees a long lifespan.  
UPF 80 (UV Protection Factor) 190 gr/m<sup>2</sup>.
